

Thanks clinics for physical help

For the past several years, the SageView Family Care and the Quincy Community Health Center have been working with the Quincy School District to provide physicals for our athletes. The clinic doctors and many staff members spend an evening performing physicals at the Junior High. The doctors perform these physicals for free and ask only that participants give a \$10.00 donation, which is given back to the school's ASB fund. Because of the time and effort of these individuals, many student-athletes who may not have been able to participate in our athletic programs are now able to become involved on a variety of teams.

The administration, athletic department, and staff at the Junior High School would like to recognize and thank the SageView Family Care and the Quincy Community Health Center for their generosity and the success of the "free physical night."
